### Description

The Implementing Collaborative Care with Adolescent and Pediatric Patients Training is built upon the content provided in the foundational training, Implementing Collaborative Care (“Base Training”). This training is intended to help the primary care physicians, psychiatric consultants, behavioral health care managers, and other primary care practice team members gain the foundational knowledge and skills for implementing Collaborative Care with pediatric and adolescent populations. After completing this activity, participants will be able to apply Collaborative Care with pediatric and adolescent populations, focusing on patient caseload, suicide assessment, and treatment of depression and anxiety and other common issues.

**Target Audience:** Physicians, Social Workers, Nurses, Administrators - Primary care physicians and psychiatric consultant physicians participating in CoCM and members of the primary care practice team.

**Planner:** Dayna LePlatte, MD, Michigan Medicine

**Co-Planners:** Sarah A. Bernes, MPH, LMSW, MBA, PRISM, Lindsay West, MSW, MICMT, Marie Beisel, MSN, RN, CCM, MICMT
