

2026 Scorecard

Scorecard Eligibility

To be eligible for earning points on the scorecard, each PO *must meet all* of the following MICMT engagement criteria:

- Participate in at least 3 scheduled virtual meetings with MICMT
- Review & update annual list of PO-affiliated individuals with active MICMT accounts including having individuals create accounts if missing from list
- Participate in the entire MICMT Annual Team-Based Care Conference with at least 1 PO representative (which can be practice-level care team members) at each session
- Participate in the entire MICMT Annual Meeting with at least 1 PO representative attending in person. Attendee must be in a leadership role in care management at the PO level. This meeting is not for practice-level care team members.

Funding Distribution

2026 Provider-Delivered Care Management funding will be distributed to Physician Organizations through two avenues, with different payment timelines:

1. Training Reimbursement → BCBSM will reimburse for the training of anyone affiliated with the PO at a flat rate of \$500 per person who passes the test for full-day approved MICMT training courses and \$250 per person who passes the test for half-day approved MICMT training courses. (For reimbursement, the test is expected to be completed within 5 business days of the training course. Learners are instructed to complete it during the course and via email following the course.) Reimbursement will be provided for the cost of approved non-MICMT training up to the standard reimbursement rate (\$250 per ½ day or \$125 per ¼ day). Reimbursement will be paid up to the training cap for each PO. This reimbursement will occur in the January 2027 PGIP check and include those trainings that occur between October 11, 2025, and October 10, 2026.
2. Scorecard Distribution
This distribution will occur in the January 2028 PGIP check to allow time for the outcomes evaluation.

2026 Scorecard		
Measure Description	Points	Data Source
Outcomes		
Points for the below outcome measures are earned based on the PO performance with the PDCM Outcomes VBR.	100	Outcomes measures align with BCBSM outcomes reporting for POs/sub-POs.
Pediatric: IP Utilization	12.5	
Pediatric: ED Utilization	12.5	
Pediatric: Weight Metric	12.5	
Pediatric: Composite Metric	12.5	
Adult: A1c performance	12.5	
Adult: BP Performance	12.5	
Adult: ED Utilization	12.5	
Adult: IP Utilization	12.5	

Outcomes Measurement Description

On the scorecard itself, specific targets for each of the outcomes are not mentioned as these metrics align with the measurements for PDCM Outcomes VBR analysis. The measures cover adults and pediatrics. If either set of measures does not apply to a specific PO, those points will be dropped from the scorecard and the total possible points will be updated.

Practice level VBR is earned at either a Sub-PO or PO level. If the population within that Sub-PO or PO performs at threshold or achieves the improvement threshold, then the Sub-PO or PO earns the VBR. MICMT will align the Scorecard outcomes measurement using a weighted average of Sub-PO performance to determine whether or not a PO earns the outcomes points.

For example:

The below PO has 2 Sub-POs that represent different portions of their population (PDCM attributed members):

Sub-PO	Population
Sub-PO A	60%
Sub – PO B	40%

If only Sub-PO B earns the A1c practice-level PDCM Outcomes VBR for adults, then in the Scorecard, the PO would only earn 40% of the points for A1c.
